

SKATEBOARDING.3D BY SEBASTIAN DENZ

EXHIBITION TOUR & LIMITED BOX SET

Sebastian Denz is a photographer from Germany who has gained international acclaim for his work and special approach to “space” as a human system of reference and its depiction in three-dimensional processes. For the project SKATEBOARDING.3D Sebastian accompanied by the Carhartt skateboard team travelled throughout Europe for three years. During that time he took an amazing series of 3D photographs with a unique 8 x 10 inch large-format-stereo-camera, developed by himself and custom-built camera specialist Dr. Kurt Gilde. The result of this journey is a deluxe 120-page photo book featuring a linen hardcover with an embossed title that comes in a beautiful slipcase with a linen finish on top and bottom.

Now a SKATEBOARDING.3D limited edition box set, strictly limited to 25 pieces, complements the already outstanding book.

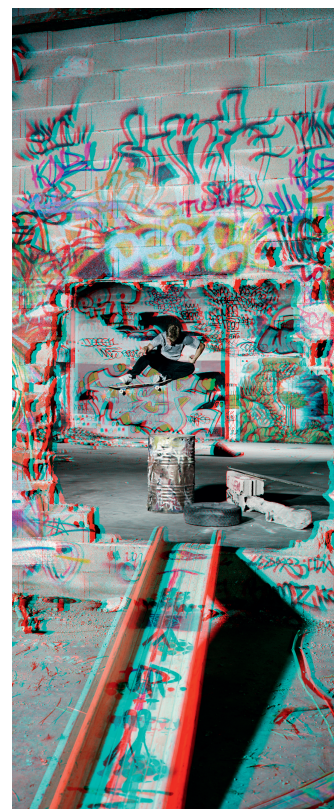

The handmade box is manufactured in linen, has an embossed logo and carries a hand-signed and numbered SKATEBOARDING.3D book by Sebastian Denz as well as a board exclusively designed by artist Stefan Marx. The box set is available only at selected Carhartt Stores during the SKATEBOARDING.3D European exhibition tour. In addition to the board you'll find a special edition postcard set and 3D glasses – working with both, the cards and the board, since its design comes in 3D, too!

Be sure to make it to one of the SKATEBOARDING.3D exhibitions at selected Carhartt Stores throughout Europe showcasing a selection of Sebastian Denz's impressive images. You may even get the chance to snatch one of those exclusive, limited edition box sets, but you better be quick.
